Current Facts and Figures About Hawaiians

George S. Kanahele

PROJECT WAIAHA

Begun in July 1981, Project WAIAHA's main purpose is to answer the question "Who and what is a Hawaiian?" through study and research on traditional and modern Hawaiian values and customs. Its activities include the publishing of its findings, teaching Hawaiian values and creating a greater awareness in people of their Hawaiianness. It is a private undertaking guided by interested citizens and funded by Amfac, Inc.

INTRODUCTION

With the large amount of published material on Hawaiians over the last few years, it may come as a surprise that this collection of *Current Facts and Figures About Hawaiians* is the first of its kind. What has probably stopped others from producing such a book is the difficulty of obtaining accurate and reliable statistical information on the Hawaiian population. We can attest to that and, indeed, want to warn our readers at the outset that in order to minimize the problem we have relied almost exclusively on statistical data gathered and compiled by official federal, state, and county agencies.

The data cover the following: population, voter registration, land, education, crime, income, business ownership, health, occupational status, welfare, Hawaiian language students, employment and Hawaiian agencies. There are gaps and discrepancies in the data that have to do largely with official policies and interpretations of "race" and procedures. Some vital statistics are not included, such as the number of pure as opposed to part Hawaiians or the number of native Hawaiian speakers. There are simply no reliable data available of this kind.

This book started out as a modest "Fact Sheet" but got bigger as we discovered more information and as we became more creative and bolder. Still, it is only a modest beginning. There is much to do in data collecting and analyzing what it all means. Too often statistical data is like the lamp post a drunk leans on: it is used more for support than illumination. We hope that you will be able to draw the right conclusions from the information we have presented herein. If nothing else, we trust we will have at least provided you with a handy, convenient source of information.

Although sponsored by Project WAIAHA, the compiler-author accepts responsibility for any faults the book may have.

*Explanation for Discrepancy:

The discrepancy between the 1980 decennial census figure for the Hawaiian population and that of the 1980 Hawaii Health Surveillance Program—a difference of 60,000—has to do with the particularly "vexing" problem of treating persons of mixed race. This problem is discussed by State Statistical Report 152 (January 11, 1982), entitled "The Geographic Distribution of Hawaii's Racial Groups, 1970 and 1980."

"One major difference among censuses and surveys on race is in the number of groups explicitly identified on the questionnaire or schedule. The 1980 census form, for example, contained blanks for 14 separate groups, plus an 'other—specific' category. The 1970 form, in contrast, contained blanks for only eight groups, plus an 'other' write-in category. *Still earlier censuses provided for Part Hawaiian entries, omitted after 1960...*" (Italics ours)

"The treatment of persons of mixed race presents a particularly vexing problem. The 1980 Hawaii Health Surveillance Program, for example, produced ethnic data for a sample of 14,407 persons sampled in housing units (but not institutions or military barracks) on the six largest islands. This survey found that 27.3 percent of all persons interviewed were mixed in their racial heritage, 17.9 percent Part Hawaiian and 9.4 percent without any Hawaiian blood. The 1970 and 1980 census forms did not provide for separate identification of such mixtures; instead, respondents of mixed blood were assigned to one of the 'pure' categories on the basis of either self-identification or race of father (in 1970) or mother (in 1980). In both years, there were also elaborate rules for the handling of multiple entries, 'Part Hawaiian' replies, and other contingencies. The 1960 census and its predecessors contained a Part Hawaiian category and assigned non-Hawaiian mixtures either to the race of the non-Caucasian parent (in the case of *Hapa Haole*—half-white—residents) or to the father's race (for other non-Hawaiian mixtures)."

The question remains, however, which figure is more reliable—115,000 or 175,000? Robert Schmitt and other local sources believe the Hawaiian population is much closer to 175,000. We have used this figure throughout this book.

Bishop Estate (The Kamehameha Schools/Bishop Estate) (1981)

The Bishop Estate is the largest private landowner in Hawaii: 341,546 acres or 8 percent of the total land area of the State.

	Kauai	Oahu	Molokai	Maui	Hawaii
Acres	11,726	56,160	4,695	2,526	266,439

% of KS/BE Land	3.43%	16.44%	1.38%	0.74%	78.01%

One-half of the estate lands is economically non-productive due to its State Land Use classification of conservation. An equally large area of the land is limited to agricultural use.
Only 6,288 acres or 1.18 percent of the land is devoted to commercial or residential use. These two uses produce over three-quarters of the total annual revenues.

In 1979, the estimated value of the Estate's holdings was $400,000,000. All the income to the Estate is distributed to Campbell's beneficiaries and, other than meeting the operating expenses of the Estate, may not be committed in any other way. All the beneficiaries are descendants of the marriage between James Campbell and Abigail Kuaihelani Maipenipeni.

Trustees of the Estate: Fred E. Trotter, Wade H. McVay, Paul R. Cassiday, Herbert C. Cornuelle.

Approximately one out of every five children in the DOE is Hawaiian.

65% of all Hawaiian children in the DOE are on Oahu.

Over the past four years, Honolulu, Leeward and Windward Districts have experienced a decline in Hawaiian students and the smaller, neighbor island districts have shown an increased enrollment. The Honolulu District showed a 19% decline while the District of Hawaii showed the greatest increase (16%) in Hawaiian enrollment over the four year period.

The Hawaiian Homes Commission

The Hawaiian Homes Commission, which formulates policy and exercises control over the Department of Hawaiian Home Lands, was established by the U.S. Congress in the Hawaiian Homes Commission Act of 1920 for the "rehabilitation" of those Hawaiians with 50 percent or more Hawaiian blood. Historically, the main function of the Department has been leasing lands for residential or agricultural and ranching purposes. Today it also leases lands for commercial and industrial uses and has recently initiated a commercial loan and business development program.

Commission Members

	Term Expires
Georgiana K. Padeken, Chairman	1982
Hazel Kinney Kauahikaua, Oahu	1981
Christobel Kealoha, Oahu	1982
Stanley Yadao, Kauai	1984
Jubilee H. Moikeha, Maui Vice Chairman	1982
Eleanor Ahuna, Hawaii	1983
Barbara Hanchett, Molokai	1984

Hawaiian Homes Commission members are appointed by the Governor for four year terms. The Commission establishes broad operating policies for the Department of Hawaiian Home Lands. The Commission Chairman serves as Director for the Department of Hawaiian Home Lands.

A staff of 24 provides support services for the Office of the Chairman. The Land Management Division employs a staff of 10 while the District Management Division employs a staff of 30.5. A total of 64.5 staff currently serve the Department.

Established authorized positions number 101.5 including appointed, permanent, exempt, SCET, CETA, and temporary positions. At present, 10.5 positions are vacant.
